Table 8D
POTENTIAL POSTDILUVIAN POPULATION (S)

Assumptions:

Average number of child-bearing women as percentage of population = **45** %

Average childbearing years = **15** to **35** = 20 years

Average number of children born to each woman in 20 year period = **5** children

Average number of infants who die young in 20 year period = **25** %

Average number of people who die from accidents, disease, e 20 year period = **35** %

Average age of death = **70** years - ► indicates location of first adult deaths in "People Died" column
