<sup>1</sup> The Globalist Age has lasted just over a century so far. Through the establishment of the Anglo-American Establishment, the League of Nations, the United Nations, NATO, the European Union, various trade-treaty associations, international financial, industrial, & media behemoths, and internet giants like Amazon, Facebook, Google, Twitter, etc., all the nations of the world are being consolidated into a single entity that President George H. W. Bush identified as the New World Order. George Orwell (1903-1950) foresaw it, but understated it in his dystopian novel Nineteen Eighty four (1949).
